

# What do we want?

Search for Marvel's characters

# What do we want?

Search for Marvel's characters

**Let's define it**

```
... given: "A string as parameter to search character whose names start with it"  
... def character = service.searchCharactersWhoseNameStartsWith("A.I.M");  
  
... expect: "A.I.M. the terrorist organization bent on destroying the world is found."  
... character == "A.I.M";
```

# Then....

Use Marvels' API

<http://developer.marvel.com/docs>

Run the spec.....

It fails because we haven't implemented

Let's implement it

# Then....
